

ABSTRACT OF THE DISCLOSURE

1  
2  
3       A carrying case providing privacy and light shade for a  
4 screen of a laptop computer disposed therein. The carrying case  
5 includes top and bottom portions movable between closed and open  
6 positions, and panels disposed on the interior surface of the  
7 case top portion and pivotally movable from flush with the top  
8 portion interior surface to form an inverted u-shaped shroud  
9 resting on the interior surface of the case bottom portion. The  
10 case top and bottom portions, and panels form a five sided  
11 cavity, a sixth side being open to permit viewing of the screen  
12 of the computer by an operator.
